Canadian Citizen · TN Visa Eligible (Computer Systems Analyst) · No sponsorship · No lottery

PROFESSIONAL SUMMARY

Computer Science graduate, **full-stack developer and systems analyst** with experience across software development, cybersecurity, security governance, and AI. Currently a **Security Governance Analyst at Santé Québec**, analyzing security requirements and contributing to the development of security frameworks, policies, directives, and procedures aligned with **NIST and ISO 27001/27002**. I approach problems by **analyzing requirements, designing solutions, and implementing them through software development, automation, and system improvement**.

Core areas:
Systems Analysis & Design: systems analysis · requirements analysis · solution design · software architecture · technical documentation · process automation
Software Development: full-stack development · backend development · REST APIs · web applications · system integration · production systems · testing and performance optimization
Cybersecurity & Governance: security analysis · risk management · NIST CSF · NIST SP 800-53 · ISO 27001/27002 · compliance · security policies and procedures · Active Directory · SSO · RBAC
Artificial Intelligence: LLM integration · RAG · vector search · embeddings · AI automation

PROFESSIONAL EXPERIENCE

Security Governance Analyst — Systems & Information Security
Jul 2026 – Present
Santé Québec · Montreal, QC
Systems Analysis · Security Governance · NIST · ISO 27001/27002 · Risk Management · Requirements & Documentation

- Analyze security, governance, and compliance requirements across complex, multi-site information systems used by thousands of clinical and administrative users.
- Author security governance deliverables — management frameworks, policies, directives, and procedures — for Canada's largest public healthcare network (30 institutions, 325,000+ staff).
- Apply recognized frameworks including NIST (CSF, 800-53) and ISO 27001/27002 to structure system controls, assess risk, and define compliance requirements.

Software Engineer Intern — UI Engine Programmer
May 2025 – Aug 2025
Ubisoft Montreal · Montreal, QC
C++ · Anvil/Scimitar Engine · Performance Optimization · Regression Testing · CI/CD

- Shipped production C++ features inside Anvil/Scimitar, Ubisoft's proprietary engine powering Rainbow Six Siege and Skull and Bones, deployed across 30+ countries.
- Built an automated error-detection and reporting tool in C++ that reduced bug triage time for 200+ developers across international studios.
- Developed performance-optimization utilities and conducted functional/regression testing on active AAA production titles with millions of players.

IT Project Coordination & Systems Analysis Intern
Sep 2024 – Dec 2024
CIUSSS / CHUS — University Hospital · Sherbrooke, QC
Systems Analysis · Requirements Analysis · Enterprise IT · Healthcare Compliance · Vendor Management

- Coordinated the full IT project lifecycle for a 20,000+ employee healthcare organization, analyzing requirements and managing vendors, resources, timelines, and compliance documentation.
- Produced technical analyses and requirements documentation; supported cross-functional clinical and IT teams with direct exposure to enterprise-scale systems governance.

Software Development Intern
Jan 2024 – Apr 2024
HumanWare · Montreal, QC
C# · .NET · MVVM · OCR · Image Processing · Cross-Platform · Agile/Scrum

- Built accessibility software for low-vision users in C# using MVVM, integrating camera systems, OCR, and real-time image processing on constrained hardware.
- Delivered cross-platform features end-to-end within an Agile Scrum team, meeting sprint commitments and contributing to code reviews.

PROJECTS

GRCB Laboratory Management Platform — ongoing (adopted by the university) *2024 – Present*

University of Sherbrooke · Sherbrooke, QC

Java 17 · Quarkus · Angular · PostgreSQL · Keycloak · WebSocket · SSO · RBAC

- Full-stack management and scheduling platform for the Cement and Concrete Research Group, replacing manual processes for equipment reservations, material inventory, and access control; started as a capstone and continued into an application being integrated at the university.
- Architected a normalized PostgreSQL schema with real-time calendar sync via WebSocket, and integrated Keycloak with @usherbrooke.ca SSO and granular RBAC.

Foldio — Multi-Tenant RAG SaaS *2025 – Present*

Personal project · In development

Next.js · FastAPI · PostgreSQL · OpenAI API · SQLAlchemy · Docker · REST APIs · RBAC

- SaaS platform letting SMBs query internal documents via AI, multi-tenant with organization management, subscription tiers, and role-based access control (RBAC).
- Implemented complete authentication, email onboarding, and a freemium model with per-tenant limits enforced at the API layer.

TECHNICAL SKILLS

Systems Analysis & Design: Requirements analysis, systems analysis, technical documentation, UML, system design, enterprise IT coordination
Security & Governance: NIST (CSF, 800-53), ISO 27001/27002, security policy authoring, risk & compliance, Active Directory, DNS/GPO, cryptography, SSO/Keycloak
Languages: C++, C#, Java, Python, JavaScript, TypeScript, SQL, Bash
Backend & APIs: FastAPI, Node.js, Quarkus, .NET, REST APIs, WebSocket
Frontend: React, Next.js, Angular, HTML/CSS, TypeScript
Databases: PostgreSQL, MySQL, Supabase, SQLAlchemy
DevOps & Cloud: Docker, Git, CI/CD, Linux/Unix, Windows Server, Agile/Scrum, Jira
AI / ML: RAG pipelines, OpenAI API, LLM integration, vector search, embeddings
Languages (Human): French — Native | English — Fluent

EDUCATION

B.Sc. Computer Science — Specialization: Cybersecurity & AI *Completed 2026*

University of Sherbrooke · Longueuil, QC

Coursework in systems analysis, software engineering, cybersecurity, databases, distributed systems, and AI.

Diploma of College Studies — Computer Science / Programming *2020 – 2023*

Cégep Édouard-Montpetit · Longueuil, QC
